Skills

- Almost 4 yrs exp | Flutter | Android | iOS | Sqflite | DDD | Feature First Architecture | Performance optimization
- Riverpod | BLoC | Getx | Firebase | MCP | CI/CD | Unit, Widget, Integration testing (Patrol) | Playstore, Appstore releases
- UI | UX | Design Patterns | Font icons | Lottie | Rive | SOLID | Homescreen widgets

Experience

Product Engineer **Samaaro** *Bangalore, India* **07/2024 - Present**

- Led the end-to-end development of **7 Flutter mobile applications** (5 client-facing, 2 internal) from architecture to production deployment.
- Introduced organization's **mobile platform from scratch**, establishing engineering foundation and architecture for future mobile products.
- Designed and built a **white-labeled Flutter platform**, reducing new client implementation effort by **~40%** and enabling faster delivery.
- Contributed to a **~30%** increase in product upsell opportunities by introducing a reusable white-label mobile platform for enterprise.
- Delivered scalable event applications for enterprise clients including **PepsiCo, Apex G-roup, and Apex Invest** across Android and iOS.
- Implemented **Clean Architecture** with **Riverpod, BLoC, and GetX**, improving code maintainability and feature scalability by **~50%**.
- Integrated **REST APIs, WebSockets, push notifications, Firebase, and third-party SDKs** to power real-time user experiences.
- Collaborated with cross-functional teams to deliver production-ready applications while establishing reusable components and engineering best practices.
- Developed an **offline-first** architecture with local data persistence and synchronization, ensuring seamless user experience.
- Managed **10+ production releases** across the **Apple App Store** and **Google Play Store**, ensuring reliable deployments and compliance.
- Automated build and release workflows through **CI/CD**, reducing manual release effort by **~70%**.
- Designed **scalable networking** and repository layers, simplifying API integration and improving code maintainability.
- Worked in Agile development environments, participating in sprint planning, feature implementation, and production releases.
- Built **reusable Flutter module**s, accelerating feature development and improving code consistency across projects.

Mobile Application Developer **WHY Global Services** *Chennai, India* **10/2022 - 07/2024**

- Developed and delivered cross-platform Flutter applications for Android and iOS with a strong focus on performance, responsiveness, and native user experience.
- Built end-to-end features for products including **Trucklah** and **Abhis LMS**, implementing booking workflows, learning modules.
- Integrated **REST APIs, GraphQL, Firebase, Google Maps, WebSockets, and third-party SDKs** to deliver feature-rich mobile applications.
- Implemented scalable state managements **BLoC, Riverpod, Provider and GetX**, improving code maintainability and project architecture.
- Developed secure authentication, permission handling, offline storage, and background services to enhance reliability and user experience.
- Optimized application performance by reducing unnecessary rebuilds, improving rendering efficiency, and minimizing network overhead.
- Collaborated with product managers, designers, backend engineers, and QA teams to deliver production-ready features.
- Participated in code reviews, debugging, and technical discussions, contributing to higher code quality and engineering best practices.
- Mentored **50+ Flutter interns**, conducting technical sessions on Dart, Flutter fundamentals, app development with clean architecture,
- Resolved production issues and delivered regular feature enhancements, contributing to stable releases across Android and iOS platforms.

.

Volunteering

Core Team Member **Namma Flutter || Flutter Chennai** *Chennai, India* **11/2024 - Present**

- Contributed to organizing developer events, coordinating speaker outreach, and **conducting technical sessions**, while actively engaging with the broader developer community.

Key Achievements

- Public Speaking - Delivered technical sessions on Flutter topics including **Custom Rendering,** Mobile CI/CD, and Deep Linking at developer community events, sharing practical implementation strategies and best practices.
- NammaWallet - Open Source Contributor - Contributed to feature development including **home widgets** and **contributor module**s
- Technical Writer - Medium - Published articles on **Deep Linkin**g, **CI/CD** (Fastlane), and **mobile security practices**
